

COMPANY PROFILE

With over 15 years in the IT business, we have come to understand the environment in which our customers operate. This allows us to diagnose problems with accuracy and provide reliable solutions, incorporating state of the art technology.

At no cost, we offer to provide an assessment of your IT infrastructure to identify any inefficiencies that are having, or could have, a negative impact on your business. The report we supply will provide recommendations to minimise costs, remove risks and generate increased productivity.

Our support options include: remote monitoring, telephone support and on-site repairs. These options can be accommodated in

- a monthly service level agreement: A fixed fee based on number of users, computers and servers to be maintained.
- a cash call-out service: An hourly rate based on R580

While the support of our customers IT platform remains our core business, we also supply computer equipment at highly competitive pricing. Our experience shows that recommending the most ideal solution for your unique requirements is the basis for a trouble-free working environment.
